The screenshot shows the phpMyAdmin web interface in a browser. The address bar indicates the URL: localhost/phpmyadmin/index.php?route=/sql&pos=0&db=toko_sahal&table=buku. The interface shows the 'buku' table selected in the 'Database: toko_sahal' section. A green message bar at the top states: 'Menampilkan baris 0 - 2 (total 3, Pencarian dilakukan dalam 0,0003 detik.)'. Below this, the SQL query 'SELECT * FROM `buku`' is displayed. The table data is shown with columns: id_buku, judul, penulis, and harga. The data rows are:

	id_buku	judul	penulis	harga
<input type="checkbox"/>	1	Belajar SQL	John Doe	100000
<input type="checkbox"/>	2	Pemrograman Python	Jane Smith	150000
<input type="checkbox"/>	3	Data Science	Mike Johnson	200000

Below the table, there are options for 'Operasi hasil kueri' (Copy, Salin ke clipboard, Ekspor, Tampilkan bagan, Buat tampilan) and a 'Konsol' section for running SQL queries. The browser's taskbar at the bottom shows the date and time as 12:23 on 24/12/2024.

```
1 UPDATE pelanggan SET alamat = 'Jl. Ahmad Yani No. 5' WHERE id_pelanggan = 1;
```

```
1 REPLACE INTO buku (id_buku, judul, penulis, harga)
2 VALUES (1, 'Belajar MySQL 2', 'John Doe', 120000);
```

```
1 TRUNCATE TABLE transaksi;
```
